Do Faculty and Students Use the LMS App? App-solutely! Ways to Support Students and Faculty Who Use the Canvas App

Gannon Nordberg

Erin Mills, PhD

**Lord Fairfax Community College**

# Who We Are

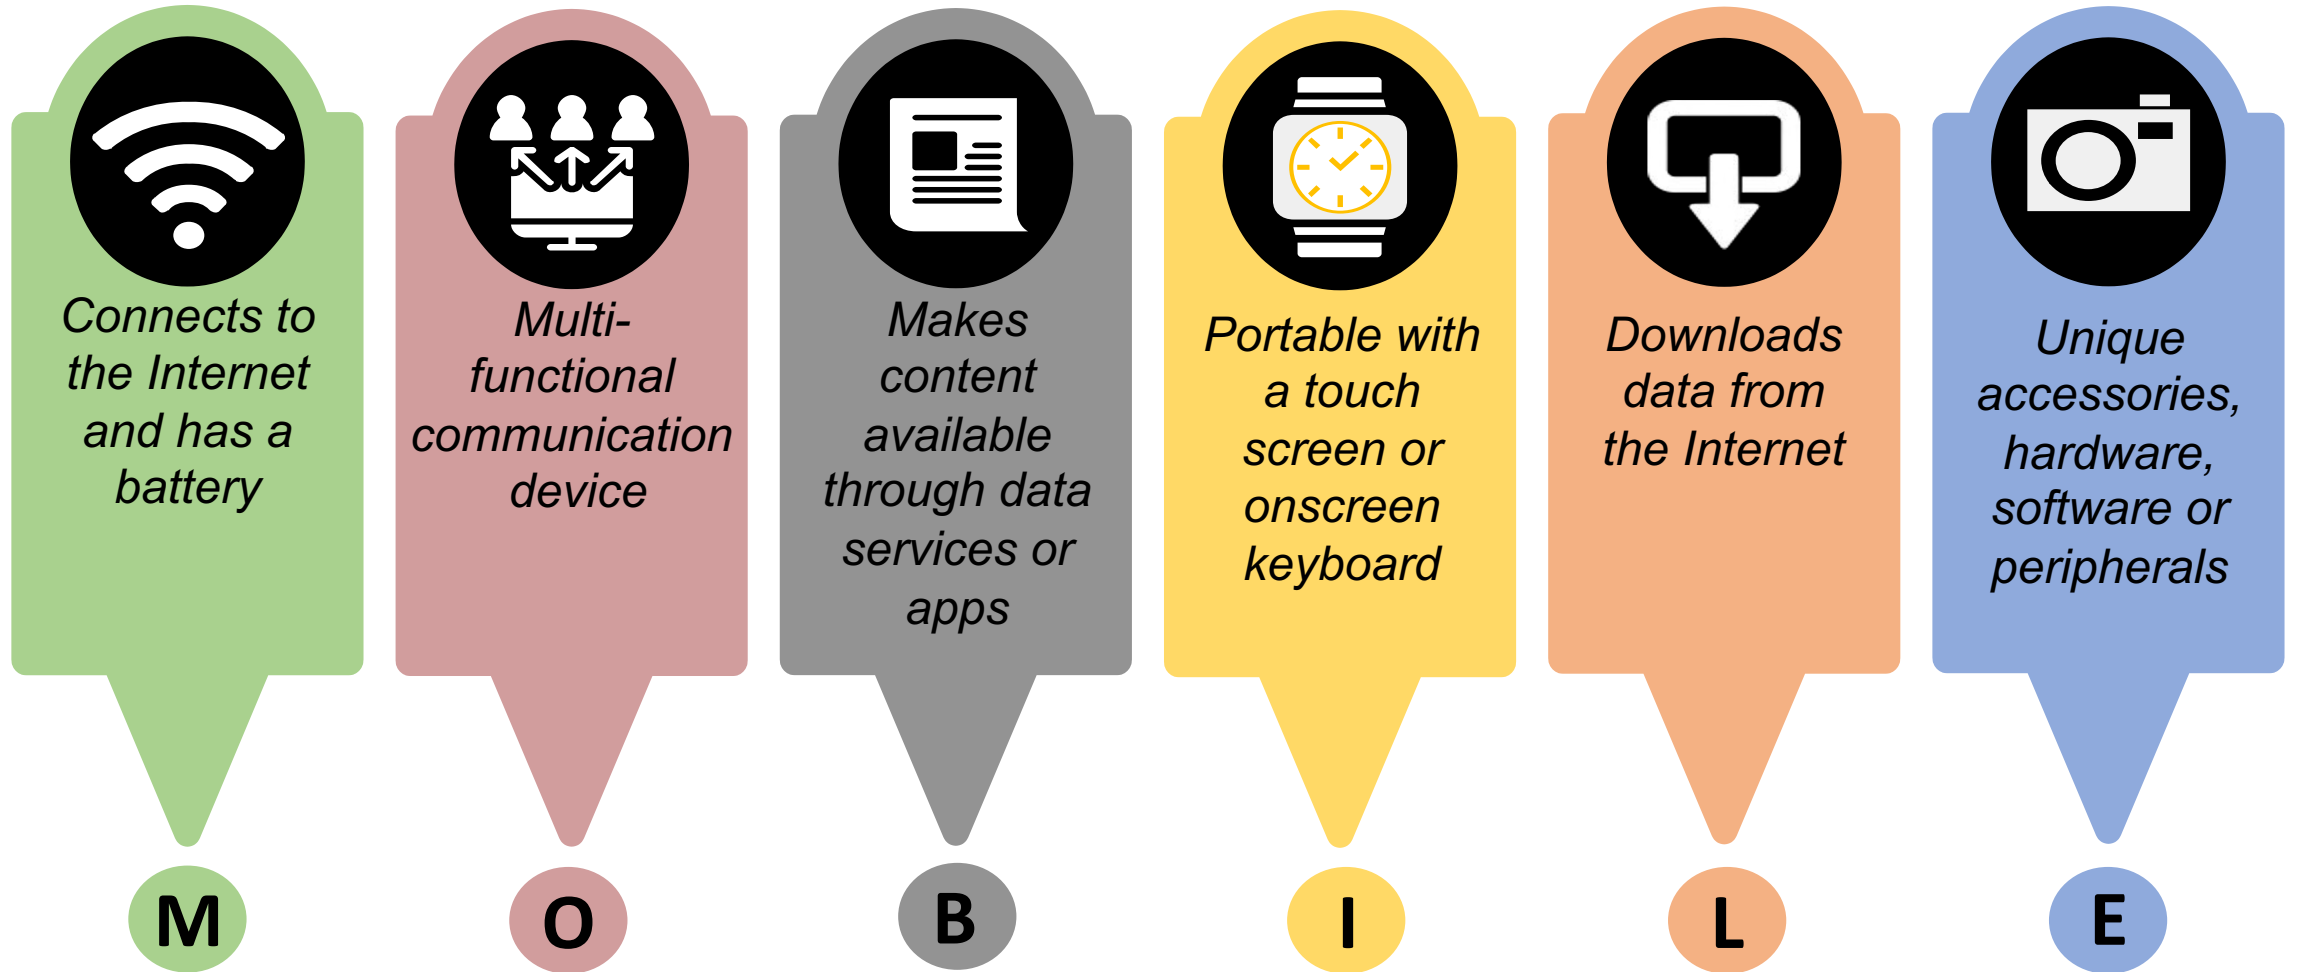

The Virginia's Community College System (VCCS) is made up of 23 community colleges across the commonwealth.

- 15,000+ faculty and staff
- 220,000+ students

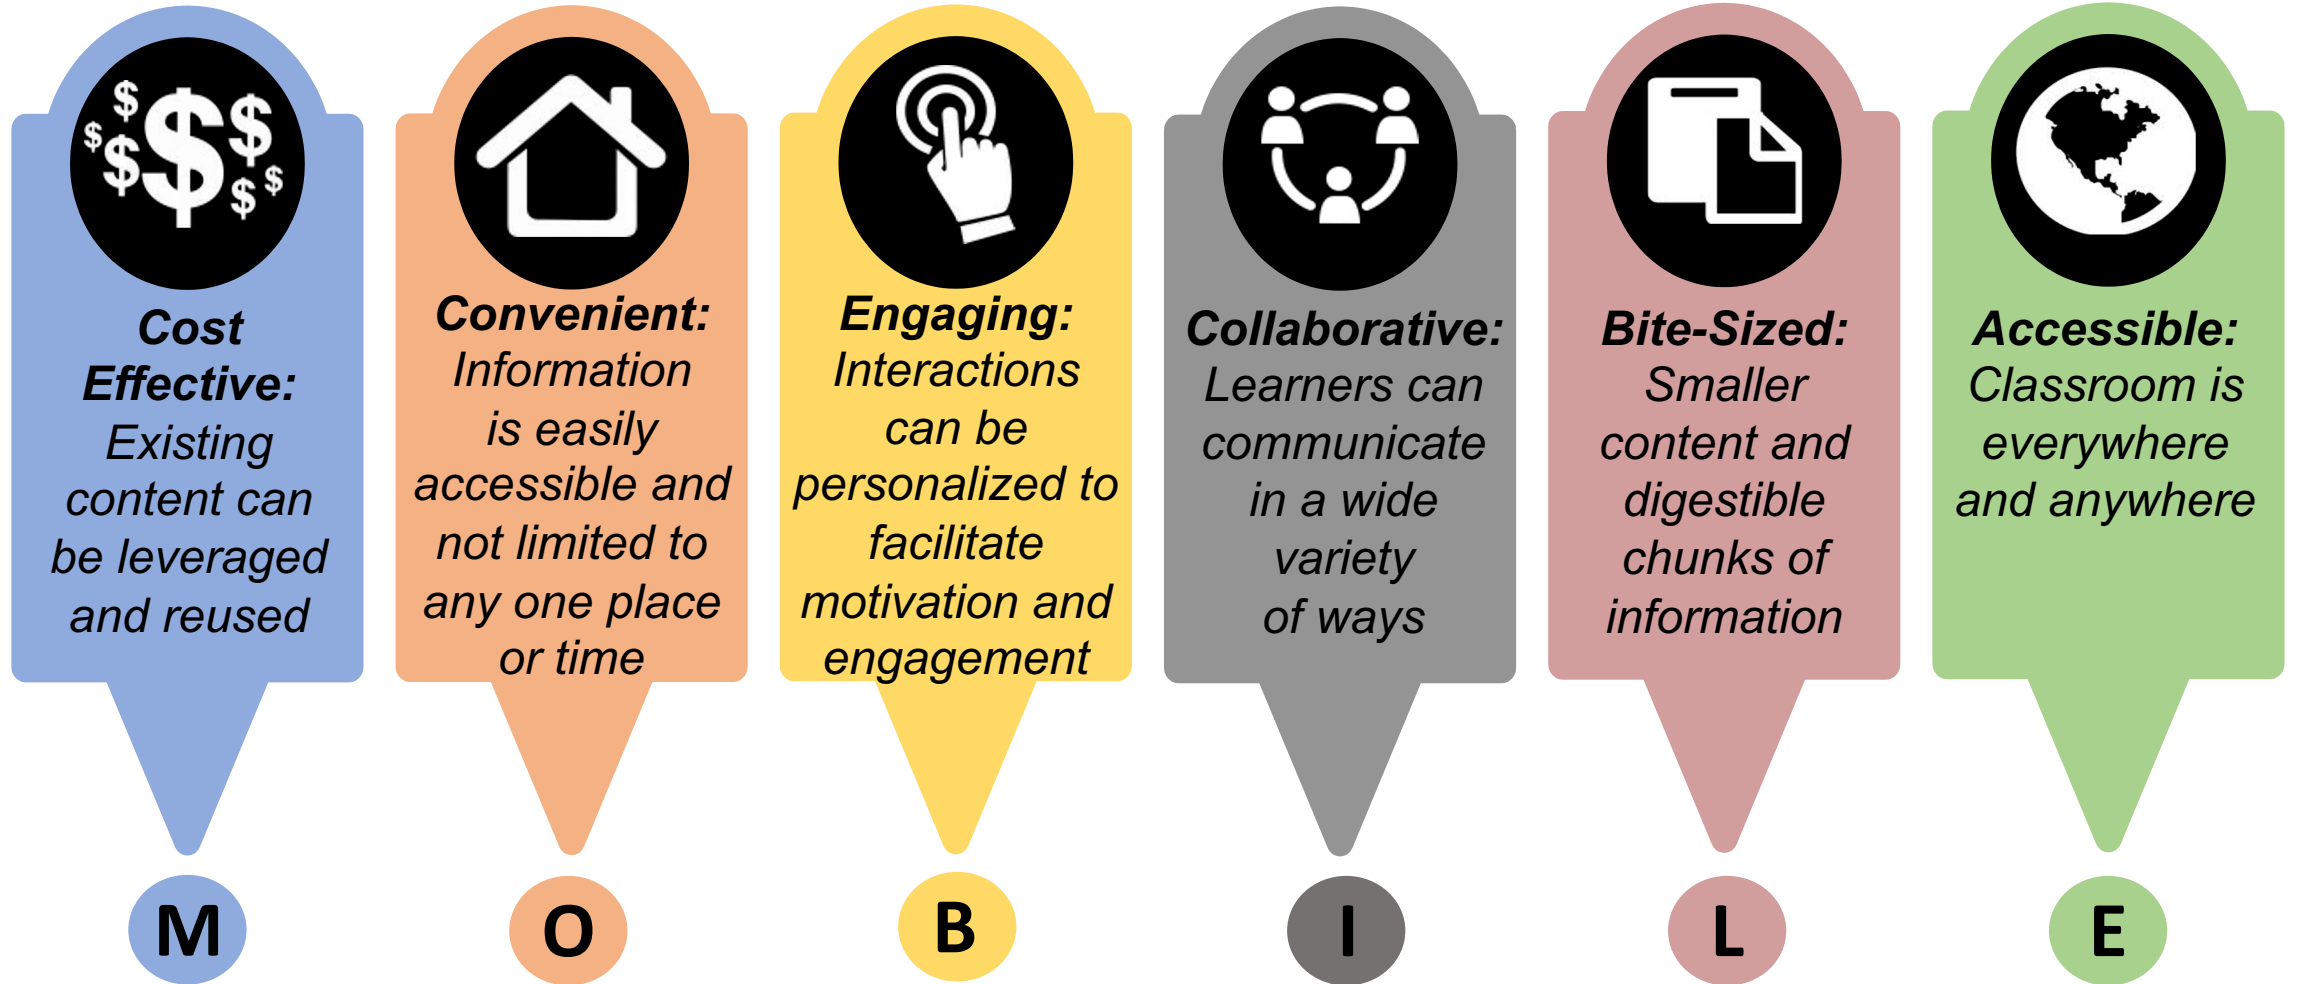

Lord Fairfax Community College (LFCC)

- 400+ faculty (~100 full time)
- 12,000+ students. (~5,000 active Fall 2019)

# Describing “Mobile Learning”

# From LMS Implementation To App Awareness

## Focus for 2019

Last year we transitioned over 4,000 courses and all users from Blackboard to Canvas in the span of 12 months.

## Focus for 2020

This year our focus is on continuous improvement and course refinement including awareness for using more Canvas tools - such as the Canvas app.

# Student's Positive App Feedback & Challenges

**Positive Feedback:** Students were using the app primarily to keep track of assignments and stay up to date with the course.

*“The thing I like most is that I always have my phone on me ... I am always updated with my classes.”*

*“I love being able to check something quickly within Canvas.”*

**Challenges:** Students expressed a desire for more consistency in how instructors use the Calendar and other built in features.

*“I wish all professors were required to utilize the calendar.”*

*“The app refreshes itself when my phone goes to sleep so I need to make sure I hit “submit” or it deletes everything I’ve drafted.”*

# Teacher's Positive App Feedback & Challenges

**Positive Feedback:** Teachers were using the app primarily for convenience.

*"I like that it lets me feel connected - when I need it - especially when I am away from my office/computer ... I can respond to students in an efficient way or even quickly grade using the rubric."*

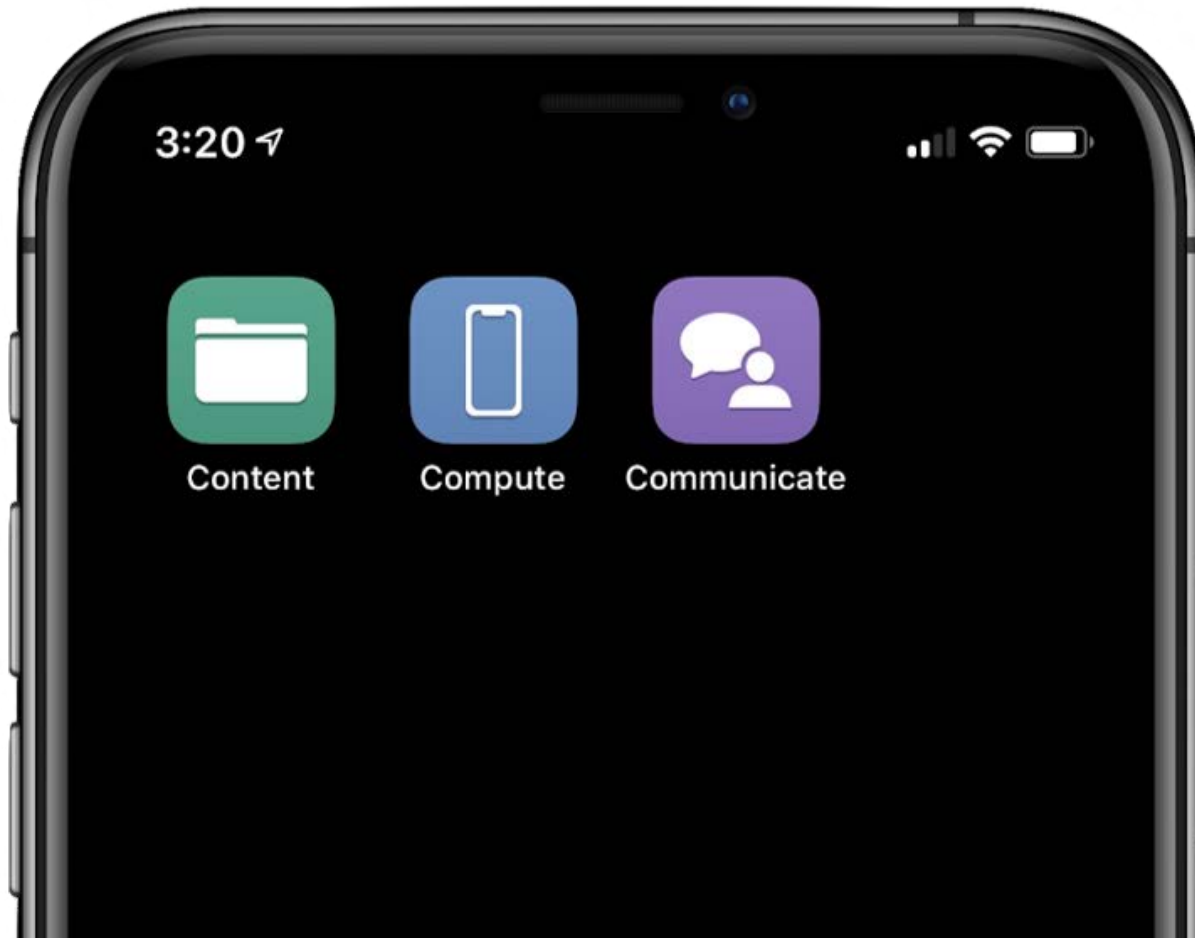

*"It's easy to make changes to assignments, extend due dates, or correct errors ... \*cough\* like when I forget to publish something (Oops!)"*

**Challenges:** The teachers expressed a need to become more familiar with the app and more time to learn it.

*"I want to be able to publish an announcement to multiple courses at once - like when it snows."*

*"I have cross-listed courses so its complicated to navigate on a tiny screen."*

# Faculty Next Steps and Design Considerations

# Content

## Content Barrier

- The never-ending scroll
- Directions unique to interface
- Static content

## Design Consideration

- Microlearning, and searchable content or links to longer descriptions
- Directions need to be location agnostic
- Responsive content, Canvas Pages work best, module requirements

# Compute

## Computing Barrier

- File size
- Technology “crashes”
- Flash and Java don’t work well on mobile devices
- Publisher content and user experience

## Design Consideration

- Large file/item downloads may require Wi-Fi
- Helpdesk and “Plan B”
- Quiz verbiage for devices

# Communicate

## Communication Barrier

- Mobile is what they do between doing other things
- Distracted learners or those who need more practice

## Design Consideration

- Content chunking, table of contents and content access on the go
- Self-paced practice materials and a reduced number of clicks
- Use the app to check how your content appears on multiple devices
