# Escape the Room with Mastery Paths

Carmel Clay Schools, Indiana

Kate Masterson  
Training and  
Development Specialist

Amanda Hoagland  
Supervisor of Learning

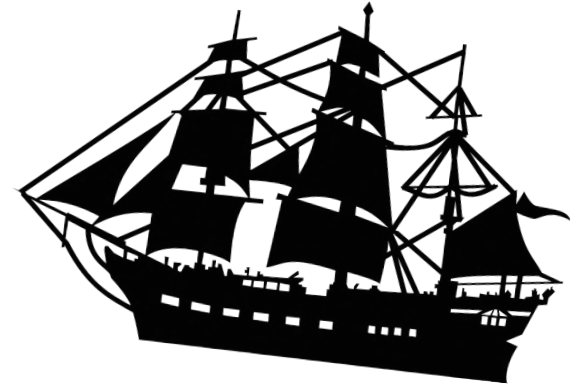

# Preplanning

- **Identify the Why** - What are your learning targets? How might backwards design be beneficial to your planning?
- **Invent a Scenario** - What theme or story might you use?
- **Structure the Lessons** - Keep it simple! Start with a few challenges for students to advance through.

\*Use the Escape Room Template (story-board style) found in our Canvas Commons course to aid you in your planning.

# Design

- **Content** - Create and curate in your course first, then set up MasteryPaths.
- **Canvas Commons** - Find digital content to reuse/remix. Use content you already have.
- **MasteryPaths** - Customize the learning path students will take. Tips for creating paths are in the Canvas course.

# Live Demo – Student View

## Escape from Cyber Pirates: A Digital Citizenship Adventure

### Challenge 1: Locked in Captain's Cabin

Identify the weak password, it will help you escape. Make strong passwords protect yourself online!

### Challenge 2: The Harpoon Room

Choose the best tackle for your voyage home by identifying phishing tactics used by pirates.

### Challenge 3: The High C's (credible or clickbait?) Identify credible information. Pick the right boat to avoid fake news, scams, and clickbait.

\*The Treasure Chest:  A treasure trove module of resources just for teachers!
